ntiful Twin Brides in the West.

Beautiful Twin Brides in the West.

We had the pleasure to see the newly made twin brides at the Gibson House last night, and must confess that a more perfect exemplification, of the French story of Girofle Girofla could hardly exist. They were at supper with there husbands last night when we saw them and a nice little tea party the four made. The bridegrooms are brothers, but not twins, It is not often in a lifetime that one is permitted to see two brothers marry two twin sisters. The husbandsare easily distinguished the one from the other. The elder one wears full whiskers while the younger has simply a mustache. The trouble to be apprehended is in the sameness of the wives, and a very pretty sameness it is. To use a homely but trite phrase, they are as like as two peas. To describe both: They are of a medium size, perfect bruncttes, dress exactly alike, and seem to be about twenty years old. Beauty has richly endowed these fair brides and placed its dimpled seal in the checks of each. How in the order of human passion it came to pass that either of the husbands could fall in love with his wife without falling in love at the same time with her sister passes our understanding. It has been suggested that each of the Morgan Brothers fell in love with both the Stewart sisters, and, to settle the matter, put thir sweethearts in a bag, shook 'em up, and drew cuts for the one that out first. We suppose they know, but we don't see how either of them knows to which one of the twinshe is married. They ceme into supper, and by judicious assortment were seated each at the right hand of her husband. When they went out of the dming room one couple was allowed to get some distance in advance before the other started, to prevent confusion.—Crecimate Enquire.

New York Black Hills Company NEW YORK, May 1.—The New York

New York, May 1.—The New York Black Hiris Company, which has been organizing for the last two weeks, in conjunction wit Baston and Philadelphia companies, for location in the Black Hills country numbers about 1600 men. The President, Mr. O. II Plerson, is in communication with authorities at Washington who have summoned delegations of Sloux Chiefs to effect if possible, a treaty with them for the surrender of their lands. They intend to secure a large territory and lay out villagas, districts and farms, and they will locate and work the gold mines. They have arranged with the Black Hills at greatly reduced rates, \$55 heing the price of passage from either New York, Boston or Philadelphia. The three companies already number over 1800 men, and applications for membership are constant. All the companies will need in New York on the 11th instant to perfect the organization and the details of the enterprise.

peration.

The plan, co-operation in manufacturing pursuits has been attended with a great degree of success. The following facts were laid before the co-operative congress in London, where delegates from about one hundred and fifty societies of England, Scotland and Ireland composed the body. Three co-operative stores in Lancastershire have severally accumulated in a few years £100,000,£200,000 and £500,000 capital out of profits. The co-perative societies in Oldham were doing a very lively business. They bought their own grain, ground their own flour, and were turnind a mill product of from £200,000 to £300,000 a year. They own the doction factories with an aggregate capital of £3,600,000 subscribed by workingmen. Their fretail stores made a profit of £3,000,000.

Cancar Removed—The Phanizedle Messenger says:Mr. Mordecial Cable has been suffering for a long time from what at first was but a small pimple on his upper lip, but which grow in time the size of a nickle five cent piece and two or three times as thick. He has burned it with caustic—in fact tries everything he could think of even the consulting nlysicians but he could to consulting the could the consulting the could be consulted to the could be burned it with cause, and the everything he could think of even to consulting physicians, but he could get no relief, and the pimple still grew in size. Seven years have passed away since this disease first started, and until the Rev. W. Evars came to town, he almost despaired of relief. Hearing that gentleman was an adept at such diseases, he made application and Mr. Evars took the case in hand, and applying a plaster, told his patient to go to work that in due time the cancer would drop out. He went to work and ir nine days it dropped out as he was going home on Thursday morning last.

ing home on Thursday morning last.

A discovery of some interest has just been made in the island of Dominica. Drs. Freeland and Nicholls. Capt. Gardiner, and Mr. Watt, exploring the steep and forest covered mountain behind the town Roseau, found a boiling I ke about 2,600 feet above the sea level, and two miles in circumference. When the wind cleared away for a moment the clouds of sulphurous steam with which the lake was covered, a mound of water was seen ten feet higher than the general level, and cuused by violent ebullition. The margin of the lake consisted of beds of sulphur, and its overflowing found of sulphur, and its overflowing found of sulphur, and its overflowing fexit by a waterfall of great hight.
